

FABRICATION PROCESSES

Brush Wellman Electrofusion Products ensure project success through their fully-integrated approach from design through critical processes. The entire project is handled in-house for total process and quality control. Their equipment and processes can satisfy the most demanding requirements in :

- Atmosphere furnace processing
- Brazing
- CAD/CAM engineering
- Chemical Processing & Photo-Etching
- Cold rolling
- Conventional / CNC Machining
- Diffusion Bonding
- Electron Beam Welding
- Elevated Temperature Leak Testing
- Epoxy bonding
- Hot forming
- Mass Spectrometer Leak testing
- Primers & Corrosion-Resistant Coatings
- Tungsten Inert Gas (TIG) Welding
- Vacuum Furnace Processing
- Water-Jet Cutting
